## SERVICES

All Impellers, Casings and Rotors are given a preliminary examination and evaluation, which includes failure analysis, metallurgical testing, wear and deterioration analysis to determine the cause and extent of the damage and the course of correction as well as estimated time and cost.

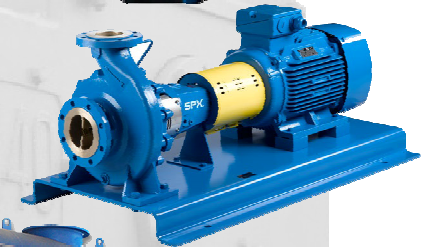

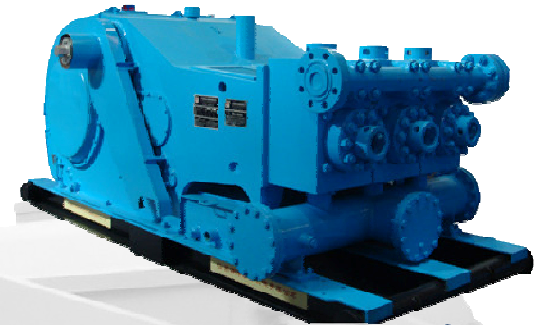

Rotech offers the most advanced Hard Facing and Protective Coating Solution available to the industry.

Offering our clients the best cost efficient way of rebuilding, repairing or replacing their components.

## WELDING

Rotech can move your project through the rebuilding process smoothly and efficiently with precision welding.

Bronze, Cast Iron, Hastaloy, Inconel, Monel, Nickel, Stainless Steel, Steel & Titanium

## GRINDING

I.D. & O.D. Grinding is used in the rebuilding and refurbishing process of most parts.

Our company uses the grinding shop in conjunction with hard chrome plating services to provide the best service for our clients.

Utilizing specialty equipment and tight tolerances our company can deliver a finished end product to you that beats OEM specifications.

## COMMITMENT

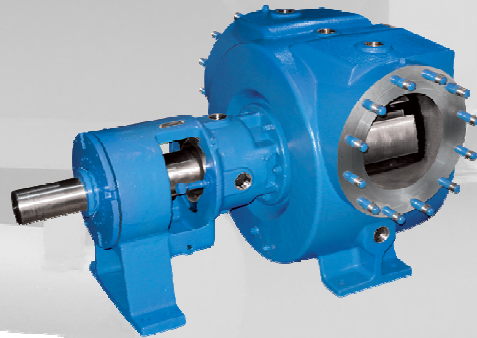

Providing quality workmanship is our commitment.

We have implemented a continuous quality improvement program.

Making our workforce renowned as the best in their field.

Be it repairing or manufacturing we are determined to do it right. "The first time, and every time"

Rotech will always supply our clients with fast, reliable service and they receive our best.

## EMERGENCY SERVICES

When faced with deadlines, outages or emergency breakdowns.

Rotech provides expert prompt service designed to minimize your downtime
